NEW LEED CERTIFICATIONS AT MMM DESIGN GROUP

NORFOLK, Va.— MMM Design Group is pleased to announce that Stephen L. Castiglioni, PE, Christine N. Armstrong, EIT, and Errol F. Plata, Jr. have become LEED™ (Leadership in Energy and Environmental Design) Accredited Professionals.

Castiglioni, MMM's Chief Civil Engineer, has more than 25 years of experience in all phases of site planning and land use development, traffic engineering and all civil engineering disciplines. Armstrong, a structural engineer at MMM Design Group, is a Duke University graduate, and joined the firm in 2006 after working as an intern the previous two years. Plata, MMM's Senior CAD Coordinator, has 20 years experience in computer aided design and is the senior technical advisor for MMM's architectural department.

LEED™ Accredited Professionals are specialists in sustainable design and construction, green engineering, and building projects. Green buildings enhance the economic bottom line through increased marketability, the environmental bottom line through a reduced environmental impact and the people impacts of building green, which can be seen in reduced absenteeism.

MMM Design Group is a full-service architecture, engineering and planning firm headquartered in Norfolk. The firm's multi-disciplined team of professional architects, interior designers, planners, landscape architects, civil, structural, electrical and mechanical engineers has experience with projects in the fields of higher education, defense, homeland security, criminal justice, transportation, recreation, environmental protection, and historic restoration.
