NEW LEED CERTIFICATION AT MMM DESIGN GROUP

NORFOLK, Va.— MMM Design Group is pleased to announce that Joseph L. Craig, PE, has become LEED™ (Leadership in Energy and Environmental Design) Accredited Professionals.

Craig, an electrical engineer at MMM Design Group, is an Old Dominion University graduate, and joined the firm in 2006 after working as an intern the previous two years.

LEED™ Accredited Professionals are specialists in sustainable design and construction, green engineering, and building projects. Green buildings enhance the economic bottom line through increased marketability, the environmental bottom line through a reduced environmental impact and the people impacts of building green, which can be seen in reduced absenteeism.

MMM Design Group is a full-service architecture, engineering and planning firm headquartered in Norfolk. The firm's multi-disciplined team of professional architects, interior designers, planners, landscape architects, civil, structural, electrical and mechanical engineers has experience with projects in the fields of higher education, defense, homeland security, criminal justice, transportation, recreation, environmental protection, and historic restoration.
